Organisational / managerial skills Leadership and Organizational abilities: School project with students as a student and as a teacher in my internship, Team leader in summer camp, Team projects in University

Job-related skills **Publications**

Diploma Thesis - Personalized training program web application.

Ionian University 2019.

The purpose of my thesis project was to implement a sports-related system, in particular a database, to create a complete and personalized training plan in a specific time frame. Achieving the above goal will facilitate the training process, as the coach will be able to provide a personalized training program to the individual athlete or group of athletes without requiring physical presence on the field. Finally, it gives the athlete the ability to save his or her personal record in whatever sport he or she chooses, which is very important for "visualizing" his evolution over time. Sport is a field of knowledge and occupation that has always been of interest to me, so with the development of this program, I combine the two fields of computer science and sport, opening a new horizon in my potential future career.

Using a Math Game to improve Basic Math Skills

Pi Tech (Greece) - Aristotle University of Thessaloniki (Greece)

Published in INTED2018, Valencia, Spain.

Educational digital game, Math game, m-learning

Finished Projects

- Racing Game based on Unreal Engine 4

A project for multimedia class 5th semester on Github

https://www.youtube.com/watch?v=_8o5Z9eIRzg

- 3D virtual representation of a Byzantine Era church

<https://www.youtube.com/watch?v=EydFgpmY1EQ>
